VOLUME No. LXX, No. 9.

REDWOOD CITY, SAN MATEO COUNTY, CALIFORNIA, FRIDAY, JUNE 7, 1929.

ESTABLISHED 1859

VIC INTEREST RIFE IN COMING ELECTION

**Consensus to Select Councilmen and Vote On
Bonds for New City Hall Next
Tuesday, June 11th**

Today the voters of Redwood City will vote on two important propositions, the selection of two additional members of the city council, and the issuance of \$65,000 in bonds for the enlargement of the city hall.

The election of two members of the city council was made necessary by the expiration of the term of office of two of the council members, which occurred on June 1st.

The candidates are in the field for the two available positions, Paul Smith, William J. Dusen and...

New Hours Set For Opening of Public Library

The public library will be open from 10 a. m. until 9 p. m. from now on instead of from 2 till 9 p. m. as heretofore. The new hours were decided upon by the board of trustees of the library at their last meeting and are now effective.

The change was made in order to give the public a wider service through the library. Many new books have been added to the library during the past week, including many books for young people and children as well as many fiction and non-fiction books for adults.

Milk and Dairy Inspector J. J. Garland and Mrs. Garland are rejoicing on the arrival of a baby girl that came all the way from babyland on May 30.

George Davis, superintendent of the Spring Valley Water Company property, left this week with Mrs. Davis and their children to visit his former home in Dorset, England.

Mr. and Mrs. G. B. Merrill returned this week from a ten-day trip to the southern part of the state.

Mr. and Mrs. Thomas Nelson are enroute on a vacation trip to be spent in the middle west. They will be away for several weeks.

Mr. and Mrs. T. C. Rice visited their son Kenneth Rice and family in Los Angeles over the week end. They left Wednesday and returned Sunday evening, and while in the south enjoyed an airplane ride to Santa Catalina.

Three-Act Play Promises Treat To Fun Lovers

June 21 will be a day long remembered by theatrical "fans" of this district, for the three-act comedy, "Nothing but the Truth," to be staged in the Sequoia high school auditorium on that date by Redwood Chapter, Order of DeMolay, and Redwood Assembly, Rainbow Girls, is reputed to be one of the best plays of its kind ever written.

Replete with unusual circumstances, and cleverly worked out by its author, James Montgomery, the play passes quickly, and the spectator does not realize that it has been two and one-half hours since the first curtain rise.

The plot of the play centers around a bet made by Truman Letts, playing the leading role of Bob Bennett, that he can tell the absolute truth for 24 hours. While winning the wager, which was made with E. M. Ralston (Walter Kellogg Jr.), Clarence Van Dusen (Darrel Tate) and Dick Donnelly (Fred Steen), the young hero loses his sweetheart and many friends and causes circumstances to occur that would never be found in any other occasion but a bet of that nature.

Harold Helveston, technical director and assistant to Gordon Davis at Stanford University, has been contracted to direct the production which will be given in Redwood City Friday evening, June 21 and in Burlingame, Saturday, June 22. Helveston has chosen the following cast:

Clarence Van Dusen Darrel Tate
E. M. Ralston Walter Kellogg Jr.
Dick Donnelly Fred Steen
Bishop Doran Edward Greeley
Robert Bennett Truman Letts
Mrs. Ralston Miss Audine Martin
Gwen Ralston Miss Myrtle Tripp
Ethel Clark Miss Jane Ingram
Mabel Jackson Miss Charlotte Rider
Shale Jackson Miss Myra Kurtz
Miss Myrtle Tripp, who will play Gwen Ralston, the feminine lead, was selected from six experienced actresses of this vicinity for the part. She is an attractive young lady, and her coach is optimistic in regards to her success.

With the experienced cast that was placed at his disposal Helveston has deemed himself fortunate, and he is endeavoring to make his first production in Redwood City the same success that all of his work at Stanford University has been.

Campaigning for the play has already begun, general admission tickets and reserved seats being placed on sale at Ryan's Drug Store. Tickets for the Burlingame production may be secured at the Burlingame avenue floral shop of Peterson and Haywood.

State to Dredge Creek Near Here

The War Department has announced the intention of the California State Highway Commission to dredge Steinberger slough near this city for the purpose of filling in the right of way of the Bayshore highway. It is the intention of the highway body to dredge from the slough 400,000 cubic feet of mud and place the mud on the highway right of way, where it will traverse the marsh just north of here.

It is necessary for the Highway Commission to secure a permit from the War Department for this dredging, and a hearing on this application will be held on June 14.

Following the filling in of the land by means of a suction dredge, it is the plan of the highway board to build up the highway foundation with rock and dirt to be taken from the hill on the east of the present highway near Belmont. The mud to be taken from the slough will be used for about two miles of the right of way.

REDWOOD CITY AERIE TO INSTALL OFFICERS

Redwood City Aerie, No. 418 will hold installation of officers this evening, June 7th. The officers for the ensuing term are as follows: A. J. Stebbins, Junior Past Worthy President; Harry Preston, worthy president; D. T. McGuire, worthy chaplain; C. K. Mable, secretary; E. H. Werder, conductor; H. Biegel, outside guard; R. A. Wyman, inside guard; M. A. Sharkey, worthy trustee; H. F. Beer, worthy trustee; P. H. Schottler, worthy trustee; and Dr. Harry E. Mason, Aerie Physician.

A class of candidates will be initiated into Redwood City Aerie on this evening also.

The Redwood City Promotion Association will hold its annual picnic Sunday at Kendall Dell. Arrangements have been made for the picnic by a committee consisting of W. O'Connor and J. S. Boedicker.

Grade School Holds Annual Graduation

Last evening a class of 100 was given diplomas of graduation from the McKinley Intermediate School of this city. The presentation was made by Henry Steinberger, clerk of the board of trustees, and was made at the commencement exercises held in the auditorium of the McKinley school.

The program last evening began with Processional, "Morning Song" by Tosti. Pippa's Song (Gleichen) was sung by the graduating class. John Gill, supervising principal of the Redwood City school district, welcomed the relatives and friends of the graduates to the exercises, and was followed by a group of songs by the high eighth grade class.

The graduation address was given by Dr. Elmer Staffelschlag, professor of education at the San Jose State Teachers College. His address was followed by the presentation of the diploma by Miss Loretta Simonson, principal of the intermediate school.

The presentation of diplomas by Henry Steinberger was followed by the presentation of awards and remarks by John W. Poole, president of the board of trustees of the district. The presentation of the class gift was made by Arthur Swanson and the exercises ended with the singing of a recessional by the graduates.

The graduating class was as follows:

Helen Emalyn Abbott
Wayne Leroy Barnett
Hazel Elvira Bevilacqua
Victor Robert Bolocco
Arthur Nelson Bissada
Victor Bordinin
Avalita Bressette
Jacquelyn Roberta Brown
Mary Peggy Buckhannan
Anna E. Byrd

Dr. and Mrs. Roy Labachotte and little daughter enjoyed the week end at the Yosemite valley.

H. L. Fletcher, who has been practicing pharmacy for the past three years in Merced, has moved to Redwood City and accepted a position in the Sequoia Pharmacy. The new druggist has had many years experience in his profession.

Exchange Club Hears Talk On Amalgamation

An interesting talk on the proposed county charter, the move to re-district the county, and on annexation to San Francisco was given before members of the Redwood City Exchange Club Tuesday evening by Attorney Charles N. Kirkbridge of San Mateo, one of the San Mateo County members of the San Francisco County Amalgamation Committee. Kirkbridge brought out many points of interest in the enabling act passed by the recent session of the State Legislature.

The chairman of the meeting was A. J. Stebbins, Redwood City Attorney. Wilbur Duxee, representing the San Mateo County Title Insurance Co., presented to the club the trophy offered by his company for the championship volleyball team in the businessmen's league. This trophy was won by the Exchange Club over a number of other teams.

A feature of the meeting was a number of harmonica solos by E. Knacksted of the O. K. Barber Shop.

LIONS CLUB CHARTER IS PRESENTED

Many Attend Meet
At Lake Club
House

District Governor John McDonald, acting for Lions Clubs International, on Saturday evening presented to the Redwood City Lions club its official charter. The presentation was made at a meeting attended by almost 300 Lions and their wives held at the new Casino near Emerald Lake. The meeting was attended by Lions from San Francisco and other bay district clubs. The charter was received on behalf of the club by its president, William Curran.

The San Jose and Palo Alto clubs together presented the local club with a large American flag. The flag was presented by Newton Glaeser, president of the Palo Alto club, and was received by Charles Holt of the local club.

A dinner gong was presented by the San Francisco club through Foster Dyer, past secretary of that club, and was received by the president of the Redwood City Club.

The address of the evening was given by Byrl Babcock of Sacramento, and dealt with the aims and accomplishments of Lionism. Fred Stripp of Berkeley, acted as toastmaster during the dinner, which was attended by Mayor Beeger as representative of the city, and by Kendall Towne and Edward Harrison, presidents of the Exchange and Kiwanis clubs of this city.

Odd Fellows and Rebakahs Elect

Bay View Lodge of Odd Fellows and Olive Branch Rebekah Lodge each held its election of officers this week. The Odd Fellows election took place on Wednesday evening. The Rebekahs' election was on the previous night.

In the Odd Fellows Lodge, Milton Legard was elected Noble Grand to succeed C. H. Heffner. Dr. R. C. Frazer was elected as vice-grand, a position held during the past term by Legard. Joseph Gibson was elected to serve as trustee of the lodge for the next 18 months. Clayton Schimpf and Ralph Talmadge were each re-elected to the positions of recording and financial secretary, respectively.

In the Rebekah Lodge, Mrs. Bertha Bomberg was elected as Noble Grand to succeed Mrs. Clara Keller. Mrs. Laura Walker was elected vice Grand and Mrs. Winnie Legard was elected as trustee. Both the recording and financial secretaries were re-elected, these positions being filled by Mrs. Bessie Vernal and Mrs. Mamie Glennan.

Children of the Lutheran Sunday school enjoyed a picnic last Sunday at Happyland, in the hills near here. The picnic followed the regular Sunday morning services of the church.

Mr. and Mrs. E. E. Whitehead left last Friday for a visit to their former home in Goshen, Indiana.

Eastern fruit handling concern will pack 200 tons of cherries at Pacific Fruit Exchange packing house in Sebastopol.

Vacaville—Residents of this place will vote on \$62,000 bond issue for construction of high school.

Western Pottery Company established plant in Stockton.

LOCAL MAN KILLED IN CAR CRASH

**Paul Smith Succumbs
To Injuries From
Wreck**

Paul B. Smith, poultry raiser of Selby Lane, came to his death Sunday night, when his car passed over the bank and overturned on the Belmont-Halfmoon Bay road, not far from the county relief home. Smith was found by passing motorists, in his car with his neck broken. The car was on its side.

Smith was a veteran of the World War. He was a member of the Masonic lodge of Bisbee, Arizona, and of the Consistory of the same place. Identification was made possible by lodge cards carried by him.

Funeral services were held Wednesday from the parlors of Laying & Tinney in this city, and were conducted by Redwood City Lodge No. 168 F. & A. M. Interment was at the National Cemetery at the Presidio. Services at the grave were conducted by officers of Allen H. Nichols Post of American Veterans of Foreign Wars.

An inquest will be held this morning at 11 o'clock by County Coroner J. C. McGovern at the Laying & Tinney Undertaking establishment.

Town to Secure Traffic Signal

The city council at its next meeting will in all probability purchase a traffic signal for the intersection of Broadway and the highway. Two bids were submitted to the council on Monday, one from the Street Lighting and Equipment Co., the other from the City Improvement Co.

The type of signal considered is that used in Burlingame, and which is operated by a car on the intersecting street blowing a horn near the signal. This opens traffic on the highway. The lights change automatically after a fixed period of time and cannot again be changed by blowing a horn until another period of time has elapsed. The signal has proved very satisfactory at Burlingame.

Firemen Hold Annual Election

Tuesday evening the Redwood City Fire Department held its annual election of officers, and re-elected all officers of the department. Mark Ryan was elected chief of the department for the fourteenth year. He served as president of the Pacific Coast Fire Chief's Association last year.

The positions of first and second assistant chief will be filled again this year by Clarence Choate and Al Russell, respectively, and A. S. Ligouri was elected for the 27th consecutive time as secretary of the department.

LOCAL FOLKS IN WILLOWS ON VISIT

Mr. and Mrs. Arnold Hess, Jr., of this city spent four days during Decoration week end with Mr. and Mrs. George Genschlo at their new home at Willows, Glenn county, and report having had a most enjoyable visit with their old friends.

George, who formerly resided here for most of his life, is a very enthusiastic and excellent wild duck hunter and enjoys the distinction of being one of the best wing shots on the coast. Both he and his estimable wife certainly did all in their power to entertain their visitors. While the lady folks motored about the interesting points around Willows, George and Arnold successfully fished the Sacramento river for striped bass and secured the limit each. A trap shoot at clay pigeons followed in which Arnold bested his friend, while George gave his guest some valuable pointers about rowing a river fishing boat which it took the combined efforts of both to propel to shore in a heavy wind.

A number of friends of Donald and Dick Harper met Tuesday evening at the home of Mr. and Mrs. George Ferguson on King street for a birthday party in honor of Dick Harper, who is one of the graduating class of Sequoia Union High School. Tomorrow the boys leave by auto for a visit to their former home in Kuna, Idaho, where they expect to make their home.

P. H. Schottler, Miles Sharkey, A. J. Stebbins and Ernest Werder will represent the local aerie of Eagles at the convention of the order which is to be held from Monday until Friday of next week at Redding.

HIGH SCHOOL WILL GRADUATE TONIGHT

**Large Class Will Receive Diplomas At
Commencement Exercises In
School Auditorium**

This evening will mark the thirty-second commencement of the Sequoia Union High School. Exercises will be held tonight at the school auditorium, at which time the class of 1929 will be given their diplomas.

The exercises this evening will begin with a procession by the senior class followed by songs of Sequoia by O. M. Carrington's choral classes and the National Hymn (West) by the girls' choral classes. Bertram Whiting will play Mozart's "Serenade" as a clarinet solo, accompanied by Katherine Robertson at the piano.

The address to the graduating class will be given by Dr. Lucy Lockwood Hazard of Mills College.

The girls of the Senior Treble Clef Society will sing "Paeon of Summer" by Suppe. The girls' taking part in this number will be Phyllis Burnett, Leota Carl, Muriel Dearborn, Gertrude Gibson, Kathleen Gish, Mervie Jean Martin, Lillian Phinney and Evelyn MacArthur.

Otis M. Carrington will make the presentation of medals and Judge Charles A. Shurtleff will present the scholarship awards. The names of those who will receive medals and awards are being withheld until the time of presentation. The gift of the senior class to the high school will be made by Kenneth Bartheaux.

The presentation of the class will be made by A. C. Argo, principal of the school, and will be followed by the presentation of diplomas, which will be made by Walter T. Kellogg, president of the board of trustees of the high school.

The graduating class of 1929 is as follows:

Helen Aabel
Viscount Pearl Allen
Marquerite Abbey Anderson
Glady's Jeannette Anderson
Ruth Armstrong
Ida A. Assmus
Lillian May Barefoot
Valerie George Barlett
Kenneth Aubrey Bartheaux
Martha Bidwell
Samuel L. Blackman
Frederic T. Blackington
Ruth Blomquist
Stanley Harry Botto

Legion Juniors Win on Diamond At Burlingame

The American Legion Junior baseball nine won the championship of San Mateo county when they trounced the Burlingame juniors on the latter's diamond by a score of 12 to 1.

Leo LeRoy, big right hander for the locals, allowed but three scattered hits and sent eleven Burlingame bats back to the bench via the strike-out.

Bob McGuire, clever third sacker, had a perfect day in the field and also collected a home run, single and a triple in four times at the bat.

"How Do They Do It?"

You have asked this question about some acquaintances of yours, no doubt—about people whose income is limited, yet who always seem to have plenty of money to do worthwhile things.

Nine times out of ten you will find that that person who makes a little go a long way has a savings account.

The same course is open to you—and your account will be most welcome here.

CALIFORNIA NEWS BRIEFS

Lucien C. Wheeler, former head of the United States Department of Justice at Los Angeles tendered his resignation as chief investigator for District Attorney Buren Fitts, effective June 15.

The supervisors of Shasta and Trinity counties decided not to join with Tehama and Humboldt counties in the formation of a proposed joint highway district for improving units of the Red Bluff-Bureka highway.

Backed by leaders in both Northern and Southern California, the tenth Olympic Games committee for 1932 filed incorporation papers with the Secretary of State.

The Corte-Madera grade between Sausalito and San Rafael is being reconstructed with oil and macadam shoulders being laid on either side. Careful driving is advised during the period of this work which will be completed early in July.

Control of the state division of motor vehicles now rests with the State Department of Public Works, Gov. C. C. Young having signed an administration measure transferring it from the finance department. Frank G. Snook, chief of the motor vehicle division, remains in that capacity with a salary of \$5,000 per year.

Herbert A. Yocom, son of Mr. and Mrs. Len Yocom of Arcata has been named one of three alternates in the Pulitzer prize awards in journalism and letters.

Following an investigation into complaints that stage companies are withholding collections on C. O. D. shipments much longer than necessary, the State Railroad Commission announced it was drafting a new set of regulations covering the matter. Some shippers had reported that collections were withheld for weeks and that the stage companies collected interest on the amounts.

The state seal, raised to a parity with the flag so far as its sanctity from abuse is concerned, must not be imitated either for advertising or less legitimate purposes, Governor Young decreed signing a measure fathered by Assemblyman Walter Feeley of Oakland, making its counterfeiting a penal offense. The new act is principally designed to prevent faking of official documents.

Reconstruction work has necessitated the closing of the state highway between Crockett and Port Costa for about two weeks. Traffic has been routed from Martinez to Crockett by way of Franklin canyon and Rodeo. Two inches of crushed rock and oil-bound surface will be laid on the roadway under repair. Similar work was done on the Martinez-Port Costa unit a year ago.

California automobile accidents resulted in the death of 529 persons, and injury of 7,380 during the first three months of this year. It was announced by Frank G. Snook, chief of the state division of motor vehicles during March, the last month on which complete state statistics are available, the death total was 367 and 2,194 children were injured. Snook said reports indicate fifty-nine drivers and seventeen pedestrians in the various accidents were intoxicated.

Northern Redwood Lumber Company of Korb, Humboldt county, has received permission from the State Corporation Commissioner to issue \$50,000 face value of its first mortgage 6 per cent gold bonds to the Charles Nelson Company. The present block of bonds is part of an original indebtedness of \$3,500,000, of which \$2,650,000 had been previously issued. As of December 31, 1928, there were \$2,145,300 of the bonds outstanding, \$504,700 having been retired. The issue is secured by property appraised at \$7,666,000.

The heaviest spring run of "Cut-throats" and "Half-Breeds" ever experienced in the waters of Rush creek between Grant and Silver lakes, has just ended, according to touring bureau. The fish ranged from one and one-half to two and one-half pounds in size, while the number of eggs gathered has exceeded by several millions that of any previous year. In June Lake the single cast of a net by the Fish and Game Commission caught three hundred fish, the smallest of which weighed five pounds. This augurs well for a banner year at June Lake. In Cull Lake the fish, being Eastern Brook Trout, do not spawn until fall, although great numbers can be seen rising for the evening meal. The Eastern Brook Trout of Silver Lake, while more numerous than in the other lakes, are smaller in size. The Higher Lakes, Virginia Lakes group, and Lake Agnew, will not be open for fishing until about July 1.

Proposal for a bond issue of \$150,000 for the construction of a new school building will be submitted to the voters at a special election with in sixty days, it was announced, following a meeting of the Pittsburg School Board.

Working drawings are being prepared by Architect W. H. Weeks of San Francisco for a ten story Class A hotel building for the San Jose Commercial Hotel Company. It will be erected on the west side of Santa Clara street, near Notre Dame avenue, and will contain 133 guest rooms. It will cost about \$500,000.

Organization of another \$1,000,000 Southern California fish cannery was effected with incorporation of the French Sardine Company of Los Angeles. Papers filed with the Secretary of State listed directors as M. J. Bogdanovich, Nick Willich, Ingvar Martin, J. A. Yakisich and Montgomery Phister, all of San Pedro.

A score of scientific societies throughout America will be represented at the thirteenth annual meeting of the Pacific division of the American Association for the advancement of science which opens June 19 at the University of California.

The Belvedere-Tiburon Chamber of Commerce will hold a meeting soon to discuss ways and means for securing a highway from Alto to Tiburon, Marin county.

Articles of incorporation were filed by the California Turkey Growers' Association with Secretary of State Frank C. Jordan forming a co-operative association for the purpose of handling the problems of producing and marketing turkeys.

The Lodi Exchange Club has launched a campaign for the purpose of encouraging the hiring of local residents as workers in the approaching fruit harvest season in preference to transient outsiders. "Hire Home Folks" is the slogan of the campaign.

Governor C. C. Young strengthened the state narcotic laws when he signed the legislative bills prohibiting the sale of veronal, a powerful sleeping potion, except by a physician's prescription. The bill becomes a law in ninety days.

The Bank of America of California filed suit in the superior court against the Tidewater-Southern Railway to collect \$2,000. The money is alleged due on loans advanced by the First National Bank of Turlock, since taken over by the Bank of America of California, to shippers of grapes in 1928.

Reports to the State Division of Labor Statistics from 736 manufacturing companies covering the month of April, show that employment conditions in California at the present time are better than they were a year ago. The report shows an approximate 10 per cent increase in industrial employment, with average weekly earnings of \$29.76, against \$28.53 a year ago, or an increase of 3.2 per cent.

The oldest twins have been reunited. After close companionship for 76 years, Ewart Cate, pioneer of Northern Sonoma, died several months ago. Recently his twin brother, Edward D. Cate, 77, died suddenly, while on a visit to his nephew, John Cate at Santa Rosa. He was laid to rest beside his twin brother in the cemetery at Geyserville.

Increase rates of about \$8700 a year, have been granted the Martinez-Benicia Ferry Company, it has been announced by the State Railroad Commission. The company asked permission to boost its rate on passenger autos from 40 to 60 cents per car. The commission granted a 5 cent increase. The passenger rate remains 10 cents per person. A sliding scale of increases was granted on trucks, ambulances, etc.

Risking their lives to save two drowning companions, Glen Fraser, 13, and Pedro Manas, 14, Orland Boy Scouts, were hailed as heroes. They rescued Henry Andres, 14, and Lillie Harden, 11, after they fell into the Diversion Dam. Both Scouts dove into the water as their two companions were sinking the second time.

The State Railroad Commission is experimenting at Glendale with devices for safeguarding highway traffic from railroad trains. Safeguards have been established at five grade crossings. Particular attention is being paid to a patent automatic gate which drops across the highway when a train approaches. Since its installation, according to the commission, there has not been an accident at that crossing whereas in the past serious crashes have occurred there. If the commission becomes convinced that the automatic gate is the best safeguard of its kind, gates will be installed at numerous grade crossings throughout the state.

The United States Forest Service and local citizens are co-operating in putting in shape an airport atop a ridge two miles east of Placerville, on a site on which the Chamber of Commerce recently took a three-year lease. It is being laid out so that a landing may be made from any direction. It is believed the field will not only serve the summer forest fire patrol, but attract transcontinental air tourists, for from this point it is an easy journey to many points of interest in the Mother Lode district.

California will witness a total eclipse of the sun about noon of April 28, 1930. On that date, according to announcement at the University of California, there will be a solar eclipse of the annular-total variety, and the shadow path will cross Central California and Northwestern Nevada. An expedition from Lick Observatory at Mt. Hamilton, headed by astronomer Robert G. Aitken, will go to a site not yet determined, in Sierra or Plumas county, where conditions for observation of the eclipse promise to be most favorable. The eclipse, according to Aitken, will be total for from one to two seconds. He points out that, out of the 5 hours and 32 minutes required for the moon to pass sun, the shadow point reaches the earth's surface for only 38 minutes.

Sixty-five boys and sixty girls, the largest graduating class in the history of the Richmond Union High School, received diplomas at exercises held June 5. The class this year is one of the few occasions when boys outnumbered girls.

Declaration that the Tahoe-Ukiah State highway will be completed from Nevada City to a connection with the Lincoln Highway, 20 miles east of Nevada City was made public at a public meeting by B. B. Meek, State director of Public Works. Construction of eleven miles of the project now is under way.

Salary increases for superior judges in San Benito, Kings and Modoc counties were approved by Governor Young. The bills raised jurists pay in San Benito county from \$4,500 to \$5,000; in Kings county from \$4,500 to \$5,000; and in Modoc county from \$3,600 to \$4,000.

Application for a charter to operate a new independent Vallejo-owned bank to be known as the Mechanics and Merchants National Bank, has been made to the Comptroller of the Currency in Washington by a group of local business men, it was revealed recently.

Divers Training for Submarine Rescue Work

Should there ever be another disaster like the sinking of the submarine S-4, a skilled group of navy divers, specially trained in Washington for submarine rescue work will be ready to rush to the scene. Daily, under the tutelage of men who worked on the S-4 and S-51 wrecks, recruits are trained to work in depths as great as 300 feet. The photograph shows Chief Torpedoman L. G. Michaels (center right), explaining the functions of a diver's dress to members of the rescue class.

Building President Hoover's Fishing Camp

View of the United States marine engineering camp on Fork mountain near the Rapidan river in Virginia, where President Hoover will fish during the summer months. More than 50 marines in charge of Capt. C. A. Phillips were building the President's camp.

Monument to Germany's War Dogs

Prof. Otto Richter, prominent German sculptor, with his fine monument to the Red Cross dogs who served heroically in the World War. The memorial will be placed either in the Tiergarten or Unter den Linden, Berlin.

He Is "Pigeon King" of Chicago

Harry Lane, treasurer of Orchestra hall, Chicago, has a hobby and is named "The Pigeon King." For years as part of his daily routine he has never failed to feed the birds at least a pound of grain.

THINGS WORTH RECORDING

New universities have been established at Jerusalem and Saloniki. Oak trees are more used for roadside planting in this country than any other tree.

One hundred thousand forest trees were recently shipped from Ireland to Germany for planting. Investigations of the dog's mental processes indicate that dogs do not see the world in colors.

The center of the earth is about 4,000 miles beneath our feet.

Tractors and modern agricultural implements are being introduced on rubber plantations of Hawaii.

A stalagmite in Carlsbad cavern, in New Mexico, is 62 feet high and resembles the Leaning Tower of Pisa. The Massachusetts Institute of Technology is considering the plan of a five-year course for undergraduates.

BREAKS DISCUS MARK

When it comes to spinning the wood on platter they call the discus, Ed Moeller of Oregon university is hard to beat. In a recent meet against the University of Washington he spun the discus 100 feet 1 inch, breaking the accepted world's record.

CLAIMS 155 YEARS

Cheick Rafal Rabal, venerable Arab, who claims he is 155 years of age. He is keen of mind and remembers the details of an Arabian massacre of 1811. He remembers when George the third was king of England, when Louis the sixteenth was king of France, and knew Napoleon when he was only a young artillery officer.

"Grand Old Liars"

The young men of today are rude to the girls, compared with the great gallantry exercised by men in olden times. . . . How elderly women must miss the grand old liars who made love to them!—E. W. Howe's Monthly.

Missed Charity

There are too many people on this earth administering their medicines to the strong and healthy.—American Magazine.

POULTRY

FINDS NEW WAY TO STORE EGGS

Small Amounts of Carbon Dioxide Will Be Big Aid.

Eggs can be better preserved if they are stored where there is a certain amount of carbon dioxide in the air, according to Paul F. Sharp of the New York State College of Agriculture, who has just published the results of some experiments on eggs in Science.

Eggs stored in ordinary air spoil rapidly after they lose the carbon dioxide which is a part of the egg. As soon as an egg is laid it starts to become more alkaline and this hastens decay. This alkaline tendency, however, can be easily and conveniently neutralized and controlled if the eggs are placed where the air contains small amounts of carbon dioxide.

This discovery has a practical result because carbon dioxide can be introduced into cold storage rooms in amounts which greatly retard the destructive changes in the eggs and yet the amount in the air will not be enough to prevent workmen from entering the storage rooms. Carbon dioxide can be used also in shipping containers and in refrigerator cars.

A convenient source of this gas can be used, such as the solid form or the gas form in cylinders. Professor Sharp says the only method of preserving eggs which approaches this one in cheapness and practicality is the oil dipping method in which eggs are dipped in a suitable oil which very nearly seals the pores. The carbon dioxide method is superior to the oil method, because the whites of the oil-dipped eggs become cloudy in storage. Those preserved by the carbon are not cloudy after the eggs are removed from the air which contains the carbon dioxide.

Concrete Runs Outside Brooder House Are New

Concrete runs outside of the brooder house are a comparatively new addition to poultry farm equipment but are coming into use because of several advantages. They enable one to use a brooder house without danger from contaminated soil near them, save the labor of moving portable buildings and make it possible to keep chicks near the dwelling or barns, says a writer in the Rural New Yorker. As they do not have to bear heavy weights, a two-inch thickness of concrete is sufficient, except at the edges, where double that thickness is needed to prevent breaking.

They should be smooth for easy cleaning, have a slope for drainage, two or three inches, according to size, and need not be roofed. They, of course, may be of any desired size, so that they give an ample outside run, preferably not less than that required inside for the same number of chicks. They may have permanent fences or movable wire covered frames to set upon the concrete. Movable frames will facilitate cleaning. They may be lightly covered with sand, loam or litter, though the essential thing is that they be kept clean to prevent infection from droppings picked up by the chicks running upon them.

Poultry Hints

Early-hatched pullets produce fall and winter eggs.

Overcrowding in the poultry house discourages production of eggs.

Sitting hens should be dusted with sodium fluoride before being put on the nest.

Gather the eggs frequently to avoid the dirt that may be carried in on the hen's feet.

Chicks hatched so as to begin laying the first of October are usually the most profitable.

As many farmers have found, profits with poultry can easily be increased by better feed and care.

When possible it is well to have a pen where the little pigs can go for food but to which the sows do not have access.

A colt may be fed on cow's milk provided the milk is not too rich in fat. Use the milk from a cow that does not give very rich milk.

Unless pullets are laying by October 1 they will miss a great deal of the high-priced egg period. If they start laying much earlier than this, there is danger of a fall moult.

A small poultry flock properly fed and cared for is more profitable than a large flock given indifferent care.

Protein is a constituent of feeding stuffs which is used by chickens for building muscles and tissues, in addition to the production of eggs.

Early feathering and early crowing mean early maturity. Early maturity means early profits. Always select the cockerels that feather first and then select from them the one that crows first.

If you were troubled last season with your little chicks dying with bowel trouble, try sulphur carbide of zinc this spring in the drinking water, about three-fourths teaspoonful to each gallon of water.

Late experiments have proved that cod-liver oil aids in increasing fertility and hatchability, promotes growth, aids in prevention of disease, improves shell texture and contents of eggs, prevents blood clots, and in general builds up the vitality of poultry.

Better Business—Better Living Better Living—Better Business

Did you ever stop to consider that most of the three score and ten years—the proverbial span of life—is spent in the Business of Living?

This Business of Living consists of trying to keep from starving or freezing—trying to live comfortably—getting our share of happiness out of life. To achieve this end we must all put forth an effort to accomplish, as the years go by.

Owing to the present complicated state of civilization—of which we are all a part—our efforts differ widely.

In this country less than half of us can produce more food and raw materials than all of us can consume.

This means that more than half of us must earn our living by making, distributing and marketing the products and services of benefit to one another.

No longer is each family a self-contained unit—producing all that the family needs. Today, as never before, we are dependent upon one another to successfully carry on the Business of Life.

Through depending upon others for the greater share of our needs there has been developed that all-important factor to human existence called Business.

Business today is carried out on the highest plane in the history of mankind. Our ancestors may have suffered in their business dealings in the days when the commercial slogan was "Buyer Beware!" Fortunately, the march of progress has forced such practices from the field.

Today the requirements for success demand that Business render a fair and honest service. Never has the phrase "he profits most who serves best" been so true as it is today.

**Service has made for Better Business and it has also made Business better!
Better Business means Better Living. Better Living means Better Business.**

If you have a "Better Business-Better Living" idea, pass it on to a business friend. Every concern represented in these pages is furnishing goods and services that make for better living. Their fundamental policy is the rule: "The most service and the best, at the least cost to the user." They realize that by fair and honest business methods they can contribute to Better Living in the community of

Our Future Water Supply

THERE has been put at the disposal of this county by the engineering department of San Francisco a vast amount of information regarding the water sources of this county, the future possibilities for development, the geologic structure and other important facts. This information represents the results of years of study by the San Francisco engineer's office and should prove invaluable to this county.

The water supply of the future is one of the serious facts that must be met, and the data prepared in connection with San Francisco's water development plans will help greatly in meeting this problem here. This problem will be met some way or other. Possibly the formation of a water district comprising the whole district along the bay shore of the peninsula will prove the most practical solution.

However, in what ever way the water problem is met it must be by the co-operation of all the cities and towns along this side of the county. And, herein, perhaps, will be the greatest good.

M. J. Bartell, hydraulic engineer who is in charge of the Hetch Hetchy work in this county, when asked why the idea of a water district had not presented itself to San Mateo County years ago, said that the reason was that each town was busy solving its own water problem but had given no thought to the needs of some other town in some other part of the county.

It will be only a few years, comparatively speaking, until the population of this county will be far greater than the available water supply. At that time the only feasible means will be for the various cities to co-operate.

However, valuable the water gained by civic co-operation may prove, probably the greatest benefit of such a move will be the breaking down the barriers of selfish city development. Co-operation in one direction may be the means of inaugurating co-operation along other lines, and result to the good of each town and the county as well.

Secondary Roads Important

GOOD roads pay dividends. They are a sign of progress and an aid to prosperity. Industry is attracted to localities which can offer a high class, extensive road system. Agriculture is encouraged and farm values increase. Their importance in connecting distant communities, cannot be estimated.

Road building is a leading item in the tax budget. Coupled with education, it is probable that highways are today the most important aid to social progress.

We have, in the United States, a state highway system that is unexcelled. From now on the most important job is to pave tens of thousands of miles of secondary or market roads. Oil and asphaltic materials which can be applied economically will do away with mud and dust.

This is essential to open up back country, relieve congestion on main highways and encourage the building up of small towns instead of draining all the business away from them to larger centers located on improved roads.

Fire As A Competitor

Harry S. Shearer, Secretary of the Fire Prevention Committee, Detroit Board of Commerce, makes a strong argument against fire waste.

Detroit, Michigan, has just been announced as the winner of the grand award of the Fire Waste Contest held each year under the auspices of the Chamber of Commerce of the United States. Mr. Shearer regards his work against fire as a sound economic service to the City of Detroit and the nation.

"Fire is competition to merchants and manufacturers. For instance, every time a dry goods or grocery store burns there is not only a loss to the community but some manufacturers and wholesalers in large cities suffer because this store has been their customer. Suppose that a man owns his own home and is contemplating the purchase of an expensive radio, new furniture, rugs, or redecorating that house, and it burns. Immediately the merchants in the town lose that business. When you stop to think that thousands of homes and stores are burning throughout the country each year, you can see the competition that the stores have with fire. I believe that these last statements I have made could be elaborated upon with further study and statistics could be gathered

ed together which would provide a new attack upon the fire losses in this country. When these facts are brought home to the merchants and manufacturers they will be able to see the enormous amount of business they are losing and should join us in our fire problem."

The Revolt Against Civilization

NO MORE notable utterance has been made by a President in years than that of President Hoover at the meeting of the Associated Press in New York. It is a message which the American people must take to heart if their civilization is to be preserved. Strong as the utterance is, much was left unsaid which thoughtful men and women can easily read between the lines.

President Hoover called attention to the fact that in individual lawlessness America leads the world. He declared that it is evident that the national habit of law-breaking did not begin with the enactment of the Eighteenth Amendment, but that the violation of the prohibition amendment and laws was only the continuance of a tendency alarmingly apparent before this change occurred. Those whose memories run back to pre-prohibition days will have no difficulty in recalling that lawlessness in connection with the liquor traffic was rampant before the prohibition policy was seriously considered, and indeed accounted for the development of public sentiment which made this drastic legislation possible.

Such lawlessness is not hard to explain. The greater political freedom achieved by a people, the greater the relaxation of arbitrary authority, the greater the danger of a lack of obedience to law. Yet that obedience to law is an essential accompaniment of greater freedom; otherwise the experiment of popular government will fail. The citizen owes more implicit obedience to law under a representative republican government than under an autocracy; for laws under a popular government are necessarily an expression of majority rule. In liberty is the seed of anarchy, unless it be guarded by eternal vigilance.

The situation in America is complicated by the fact that we have absorbed into our population millions of aliens unaccustomed to free institutions. Long held under the heel of despotism, they find it difficult to look upon laws and institutions in a new land in the spirit that should characterize a citizen of a free government. It is not accidental, therefore, that a vast majority of those who have become identified in this country with organized crime, are newcomers to the United States. They constitute but a small percentage of our total foreign population, but their activity constitutes a growing menace to public order and safety.

But after all, so long as a certain section of the American metropolitan press persists in glorifying the criminal, and attacking rather than defending the officers of the law who are constantly called upon to risk their lives in the battle with the underworld, we cannot flatter ourselves with the thought that the causes of this revolt against law and order are of foreign origin. So long as many newspapers, some of them of vast circulation and influence, persist in sneering at and attacking certain of our criminal laws, and in surrounding the commercialized activities of lawbreakers with the halo of resistance to oppression, what wonder that crime has increased to the point that in cities like Chicago there is some doubt as to whether the government or the racketeer is supreme?

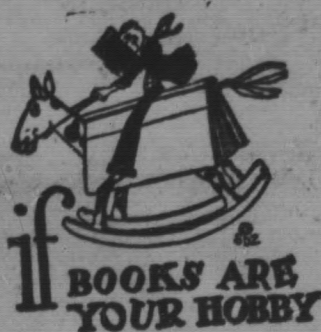

Some years ago a notable book "The Revolt Against Civilization" called attention to the fact that as civilization advances it develops within itself subversive forces which tend to weaken and then destroy it and that human history is a succession of cycles in which progress is succeeded by retrogression. There are signs that our civilization is revolting against itself. Into the network of this general subversive movement many well intentioned people with heads as soft as their hearts are drawn, while on the part of the general public there is an ominous indifference to the results which, if the teaching of history is worth anything, must bring the most serious consequences.

In view of these conditions, these words of President Hoover should be read and re-read by every editor responsible for the policy of his publication, and by every citizen as well:

"I am wondering whether the time has not come, however, to realize that we are confronted with a national necessity of the first degree that we are not suffering from an ephemeral crime wave, but from a subsidence of our foundations.

"Possibly the time is at hand for the press to systematically demand and support the reorganization of our law enforcement machinery—federal, state and local—so that crime may be reduced, and on the other hand to demand that our citizens shall awake to the fundamental consciousness of democracy which is that the laws are theirs and that every responsible member of a democracy has the primary duty to obey the law.

"It is unnecessary for me to argue the fact that the very essence of freedom is obedience to law; that liberty itself has but one foundation, and that is in the law."—National Republic.

By ELSIE FORD

Whorthwhile books are as necessary in a home as youth and joy and laughter. They represent the best of friends and are always ready to offer a helping hand, give amusement, cheer and comfort, and suggest uplifting and idealistic thought to those who own them. They are a good deal like real people; some of them just passing acquaintances, and others real friends who seem almost a part of our lives. You can usually tell a man by the books he reads as well as by the company he keeps.

Once in a very great while a book is published that seems to belong strictly to the men and G. B. Glasscock has achieved this distinction in his book "Bandits and the Southern Pacific" which has recently been published by Frederick A. Stokes. The pages of this fascinating and yet authentic story are peopled with real live men, outlaws and desperadoes who blazed a trail of blood and the rough and rugged men who set out, their lives in their hands, to track them down. In the telling of this tale, Mr. Glasscock has thrown a brilliant light on an important period in the development of the West, and told with a sincerity and simple dignity that give it lasting value as a bit of history of the old days of California. It is interesting to read in this tale of the pioneer West of bandits in the conflict with the Southern Pacific. All in all, the book is a dandy—a real whizz for the men.

If you have ink spots on any of your favorite books try using "Chlorine Water" to remove them. It is said that it will remove the stains and at the same time bleach the paper of a book.

Willett, Clark and Colby have realized their aim of producing only books which have ample justification for public appearance in the publication of the charming book verse, "White Peaks and Green," by Ethel Romig Fuller. This poet's rhythm is essentially the rhythm of life. She climbs the height—the white peaks and the green—but here and there she takes delight in the little lowly things of the valleys, orchards, markets, vegetables, chums, butterflies, children and aged folk. Then, like a true mountain dweller, she climbs her peaks again, and joyously we scale them with her—whether they be stony peaks or grassy, flooded with sunshine or obscured by clouds, white peaks or green. Her poems embody a thrill of adventure, a feel of beauty, a tang of mountain air. There is an invitation to read upon every page—and often to a group of true friends. The little volume is just the thing you would enjoy finding in your knapsack on a walking tour or vacation. And it is equally companionable on a winter's evening before a sparkling fire.

Any boy born to American citizenship may aspire to be President, and nothing can be more profitably interesting to active youths than to learn truthfully as well as entertainingly of the early life of those who have been chosen for the highest position in the world in the book, "Boyhoods of the Presidents," by Bessie White Smith and published by Lothrop Lee and Shepard, there are thirty stories of the parentage and boyhood of each president, including Mr. Hoover. The stories are followed by a rapid sketch of later events that led to the climax of each career. Both heredity and environment play their part in the development of each future President, and there is also the larger background of nature and society. The varying customs of time and locality in home, school, church and college assemblies are interestingly presented. Of the many illustrations, nineteen show birthplaces and more than half may be classed as humble. There is no more striking feature in this valuable book, showing, as it does, so effectively what a land of opportunity is this of ours, where neither poverty nor misfortune can hold back a lad of ability and character. Filled with inspiration for all, and inspiration for many.

Books kept in cases with glass doors should have shelves lined with some soft material, velvet or felt are good, so that the edges of the books will not come in contact with the wood.

No writer in all the bright galaxy of genius has this season excelled Roland Pertwee's capital tale of mystery and adventure "Hell's Loose," published by Houghton Mifflin. In the story Commander Robert Shaftoe finds a skeleton in a thick and at the same time discovers a secret that is to imperil his life and the lives of thousands of others. From the tattered pockets of the skeleton Shaftoe draws various papers capable of launching a thunderbolt to destroy one of the greatest of modern industries. The search to find the true owner of the secret leads Shaftoe to France and the glorious Noelle, daughter of the dead inventor. A terrible revolutionary outbreak paralyzes the nation by the destruction of all gasoline supplies. The skies are aflame with the light of burning tanks. Hell is loose with a vengeance. There is no hope except in the substitute fuel the secret formula provides, but Shaftoe, who knows the formula, has been taken prisoner by his enemies. Noelle's picturesque journey, Shaftoe's dramatic escape when all seems lost—all these prepare the scene for a breathless climax.

Revisions Sought By State in Plan Of School Finance

By LAWRENCE MONFORT

SACRAMENTO, June 5—(CNE)—Created to compose music for "the song of sixpence" which California's school system is singing with continuously growing volume, the Educational Commission of Nine which Governor C. C. Young will appoint by legislative sanction within a few weeks, first will grapple with organizational problems presented by the state's 440 "unattached" elementary school districts, it appears today.

Two main problems will face this commission composed of laymen; means of cutting costs of education and at the same time increasing efficiency, and laying the ground-work for the forward march of the state which already has placed it highest in the literacy column, according to educators who are awaiting announcement of its personnel with keen interest.

While, to quote former State Superintendent of Schools William John Cooper's statement recently when he assumed the federal educational commissionership, we may be a "nation of seventh-graders," in our civic duties, California is spending enough to raise the standard of its citizens several years, at least.

Despite a very united opposition to the so-called county unit plan of school organization and government exhibited by the press, teachers and the recent session of the legislature, the Governor's commission is expected to give that plan serious study, and perhaps recommend some of its essentials without adopting other more objectionable features.

There are 440 elementary districts in the state at this time not attached to any high school district, according to State Director of Education Vlering Kersey, creating additional expense and involving additional administrative confusion. These represent 13.2 percent of all the elementary districts in the state,

with a combined assessed valuation of \$144,998,220.

San Mateo county, leading the peninsula in school progress, has not a single elementary district unattached, Kersey revealed.

But 23 of the counties to date have consolidated elementary and secondary districts on a 100 percent basis, and some of the counties which have not included the most populous districts in the state.

Measured consideration of the teachers' pension plan, admittedly unsatisfactory to state and individual, tenure, further state publication of textbooks, what to do with the junior college, popular beyond all expectation and in dire need of a new financial setup, vocational training extension and like matters will be considered by the commission.

The Governor has not as yet indicated who will be named on the investigating board, but announcement of its personnel is expected by early fall.

Toll Changes Of Bay Bridge Rates

A. W. Duel, representing the San Francisco Bay Toll Bridge Co., appeared before the board of supervisors Monday with a request that the rate schedule on the San Mateo-Hayward bridge be altered. Duel asked that the rate for cars be changed from the present charge of 40 to 50 cents depending on the size of car.

A COMMUNICATION
 The undersigned, the candidates for office of councilmen at the election on the 11th day of this month, feeling that their knowledge of the facts justifies their taking a stand upon the proposed bond issue for a new city hall, join in the following recommendation to the voters of Redwood City:
 A new city hall is greatly needed as the present building was designed for a much smaller personnel and a smaller population than is at present served through officers and employees using the building. At the time the building was built, the city did not own its water distribution system and the city has also taken on other activities during the last fifteen years. The result is that the present staff is so crowded that their efficiency is impaired and solely on the grounds of economy a larger building should be provided. Additional space would undoubtedly add to the efficiency of the present force and thus redound to the benefit of the tax-payers. It may become very expensive if a fire should destroy the records of the city now housed in wooden buildings without adequate protection. This refers to invaluable records of the city engineer and the city attorney, each of whom has to be quartered at the expense of the city in private property remote from the other administrative offices. A new building with adequate space for the city engineering staff is the present difficulty. The increased area of Redwood City in the last few years, together with the increased of streets, sewers, water system, fire alarm system, and other engineering and public works naturally requires a greater housing, even according to today's demand without considering the growth that is destined to come with increased growth of the residential district on the west side of the highway and the opening up of industrial and workmen's living district along the new Bayshore highway that will soon be skirting the shore of the bay at least to Palo Alto.
 There seems to be no reasonable method of providing for the ex-

pense of a new city hall so convenient as that of a bond issue. This building will be of permanent value and the expense of its construction should be paid for by future as well as present tax-payers. It is the view of experts on municipal economics that no greater burden is placed on the tax-payers through a bond issue than through attempting to pay as you go. Bonds bear interest of about 4½%, whereas the private property owner can and usually does invest his surplus money at from six to ten per cent. The pay-as-you-go plan therefore cannot be justified solely on the ground of economy. At the present time Redwood City has reduced very materially the bond issues which it incurred in the years between 1906 and 1915, and with the increased assessment role and population the bonds for the new city hall will not impose any appreciable additional burden on any tax-payer. The present plans for a city hall provide for a uniform development of an area that is well adapted to a Civic Center. It will concentrate all public business in one locality which will be convenient to the business district of the city and it will enable the city to use additional property, which it already owns.
 The plan to acquire property at Jefferson and Webster streets for a site for a new library and the construction of an adequate library building on this site will also furnish a much needed improvement and enable the present library site to be sold and the land devoted to

TO SELL TAGS TO AID BLIND

Saturday will be a tag day in Redwood City for the American Brotherhood of Free Reading for the Blind, permission having been given to a representative of this organization to organize a local committee to sponsor the affair. The sponsors are Dr. Chas. E. Winning, Mrs. F. N. Perkins, Mrs. R. B. Morris, Mrs. John Heckendorn, Mrs. Dudley Moulton and Mrs. D. L. Bogle.

Headquarters will be the Woman's Club House, with Mrs. R. B. Morris in charge of young people's work and finances.

The American Brotherhood since its incorporation in 1921, has made and distributed over 4,000 Braille books, through the libraries and institutions circulating books for the blind.

You can aid in opening wide a new door of joy and opportunity for those who are deprived of sight by helping to print in Braille more and better books for their use.

The sale here on Saturday will be a miniature Braille book tag, given for whatever the purchaser is willing to give as a free will offering to help the worthy cause.

Headquarters will be the Woman's Club House, with Mrs. R. B. Morris in charge of young people's work and finances.

The Greater Redwood City Improvement Association will hold a whist party in the Central School on Broadway on Wednesday evening, June 19th at 8:30 P. M. for the benefit of Emerald Bowl. There will be a variety of good prizes. Viola M. Maysenholder is chairman. Everybody is invited to attend and help make the affair a success.

Redwood Circle No. 100 Order of Druids, will hold a card party in the Odd Fellows hall Monday evening. Playing will begin at 8:30.

STREAM OF GOLD

Sixty years ago the last and gold spike was driven to complete the construction of the Central Pacific's Overland Route. The event marked the birth of a new land for as truly as the hammer tapped the gold, it made possible a living stream of that metal, flowing, working and building this great state.

And as the Central Pacific, parent company of Southern Pacific, builded then to carry tea to the east, so now does the Southern Pacific operate its 17,000 miles of line to give the growing Pacific Coast ever increasing and always improving communication with all the rest of the United States. For the Southern Pacific the last spike will never be driven.

The Central Pacific, from the ground breaking at Sacramento, to the driving of the last spike, cost approximately \$61,000,000. The Southern Pacific in the last fifteen years has spent \$88,000,000 in new construction to serve the people of the West, and that without duplicating the lines of any other railroad or invading territory already served with rail transportation.

Sixty years ago, a new era began. Today the opportunity to serve is recognized by the Southern Pacific as being greater than ever before, and with the years, this company hopes to fulfill that obligation as it has in the past.

SOUTHERN PACIFIC

NEW RACE PROBLEM FACING CALIFORNIA

Filipino Labor Threatens to Create Bad Condition Through Rapid Increase in Numbers

SACRAMENTO, June 5—(CNB)—A new invasion of California by "little brown men" of the east, this time sweeping in from the Philippine Islands, today was brought sharply into relief as a racial problem that may parallel the Japanese "peaceful penetration" of a few years ago.

Social and health aspects of the new immigration problems, in addition to the effect of another supply of cheap labor on the unemployment situation, demand that "statesmanlike methods be considered to meet the condition," Governor Young's cabinet was told by Will J. French, state director of industrial relations.

Pouring into the state through the ports of San Francisco and Los Angeles and Seattle, in the neighboring state of Washington, the influx of Filipinos has become so great that during last month, for the first time, they outnumbered all other race groups in California's 352 labor camps, French asserted.

At the port of San Francisco alone, the industrial relations official reported, 2676 of the "little brown men" gained entry to the state during the last five months, with a tremendous increase in immigration during the final 90 days of that period.

Urging that the executive cabinet give thought to the social phase of the problem particularly, with the question of inter-marriage with whites as a dominant factor, Director French declared: "One of the most vital questions confronting Californians today is the unlimited immigration of these Filipinos. The absence of women in anything like proportion, compared to the total immigration, is causing some anxiety."

"Californians can well afford to find out the exact legal status of this immigration," continued French, "and statesmanlike methods should be considered to meet the condition. From the health standpoint, there seems to be a particular susceptibility to meningitis on the part of the

newcomers. This is troubling several of the districts in which Filipinos are employed." At the close of last month, the director informed Governor Young, the Filipinos forged into first position among the foreigners in California labor camps, with 2,199 men in the work camps. The Mexicans, heretofore the dominant race in the labor camps, numbered 1,995, he said.

STATE'S TAX FROM 'GAS' ANNOUNCED

San Mateo County Will Receive Share Of \$5,113,015

SACRAMENTO, June 5—(CNB)—California counties tapped the state cash drawer for \$5,113,015.76 this week, State Controller Ray Riley announced today, the big fund representing the counties' share of collections under the state 3-cent gasoline tax for the six months ending April 1.

San Mateo county's apportionment, which will go toward local road work, aggregated \$59,575.01, the controller reported.

Showing a phenomenal gain in winter travel and consumption of gasoline, the total apportionment for the October to April period was well over \$15,000,000, some \$10,000,000 of this going to the State Highway Commission. The increase in apportionments to counties totaled nearly half a million.

NOTRE DAME ALUMNAE FORM ORGANIZATION

June 1st was a gala day at Mt. Carmel School, when the Notre Dame Alumnae was organized. About four o'clock the former pupils began to arrive in groups of threes, fours and fives as the trains came in or the machines crowded with happy girls drove into the lawn-bordered drive ways. There were happy meetings, as the laughing school girls greeted friends. Yes, they were all just school girls gathered around old friends and dear teachers who were overjoyed to see and welcome again "the dear children" of former years to usher them into the beautiful convent home, whose rooms were so tastefully decorated in their honor. There were seventy-three former pupils present.

There were regrets from a host of others who look forward with joyful anticipation of the next meeting. After the election of officers the members repaired to the chapel, where the Benediction of the Blessed Sacrament was given by the pastor, Rev. J. Cavanaugh. Then all gathered in the dining room, where a luncheon was served.

Mrs. Ruth Weller Gugel acted as chairman of the meeting. The officers elected were: President, Frances Ryan vice-president, Florence Perry; treasurer and secretary, Marie Hurst.

The members lingered long chatting with old teachers and friends, and reluctantly said good-bye to the sisters and their former school companions. All declared that the reunion had been a most happy one, the memory of which would linger with them for years to come.

SAVED THEIR NEST-EGG

(By D. J. Walsh)

RUTH sat with her hands clasped tightly in her lap and listened to Mr. Ellington, her new employer, explain their product.

The offices were gloriously new; new rug, new yellow oaken furniture, new typewriter and a lecture room adjoining with several rows of new yellow chairs, facing a brand new blackboard.

"You see," said Mr. Ellington with eloquent gestures of his fat, bejeweled hand, "we have them in nearly all the largest cities in the country; Chicago, New York, Boston, St. Louis, San Francisco—the greatest little money-maker ever invented. People must eat! All right! These machines are filled fully with hot lunches, compact and sanitary—sandwich, pickle, fruit, pie or cake, see? And these pasteboard boxes are fitted into slot machines which are refilled by our wagons from the factory several times a day, see? These machines are set up near factories, schools, recreation centers, office buildings and so on. They deposit a quarter and presto! A lunch! Bound to sell! Can't help it! Now our part here in this office is to sell the machines. We are putting on the city and sell these slot machines to individuals at \$150 each, see? And out of the daily proceeds from the lunches purchased, the owner of that machine gets half. Greatest little money-maker in the country—the machine pays for itself in a year at the rate these lunches sell when they get started, and then it is all clean gravy, see?"

Ruth nodded absently. Mr. Ellington smiled of hair tonic.

"Now," he continued, "we will start on folding these circulars and getting them ready. The ads for salesmen are in all the papers today and they will be coming in here by the dozens. Tomorrow we start our lectures and next week there will be several machines in operation. Greatest little money-maker in the world, Miss Harrison."

Ruth sat at the bright yellow desk and started to fold the circulars before her. She didn't like Mr. Ellington; she didn't like the job. She longed for the daily orderly routine she had followed for seven years over in Mr. Alken's law office; the position she had left just yesterday, so that Don couldn't find her. She would show him! He would be calling up this morning and no one knew where she'd gone.

It had been a bitter quarrel and Don had said—although his eyes had told her otherwise—that he never wanted to see her again until she had taken back what she had said. She had replied she never would, but of course, Don would come back to her. He just couldn't stay away. They loved each other; they had been engaged three years, and were to be married in June. The thousand dollars which they had set as their goal was in the bank—their "nest-egg" with which to furnish their little apartment. Don had worked hard to accumulate that money and they were both very proud of the little bank book Ruth had kept until she gave it back to him—the night they quarreled.

"Finest little money-maker in the country!" Mr. Ellington was saying to a shabby, tired-looking young man who had come in in response to the ad. "Our salesmen make \$35 on every machine they sell and the \$400 per week. Just come back tomorrow and attend our lecture. We show you how—Tell you how."

The "Happy Hooligan Lunch company" flourished the first few weeks. Their advertising drew salesmen by the dozens, and they sold the machines. Business was good—and then it lagged. Ruth was very unhappy. There had been two letters from Don the first week and one night he had called at the house and urged Mrs. Adams, her landlady, to ask Ruth to the door, but the good woman faithfully followed Ruth's instructions. Then he had written her a note. "You won't give me a chance and I've tried to see you. I'm through. The next move will be yours."

And then the "Happy Hooligan Lunch company" met with serious reverses. The civic organizations investigated and there was considerable publicity. Mr. Ellington and his assistants were worried. The salesmen dropped off one by one; men came into the office and held long conferences. Ruth saw suspicious correspondence handled over her desk, and it was on the day that she thoroughly realized she was in the employ of fake promoters who had gained disrepute in other cities. That one of the few remaining salesmen on the force rushed into the office waving a paper in his hand.

"I got that bird at last, but he was a hard nut to crack! But I got him—to the tune of six machines. One

(thousand and fifty dollars! Told him he would be rich in a year! I am going to meet him at 12 o'clock at the National bank and get—cold cash! Come on, Ellington, sign your John Hancock to a little check for me—I need it!"

Mr. Ellington beamed and rubbed his fat hands together rapturously. "That is fine, O'Connor—fine! That will add a little impetus to our arguments today. Miss Harrison will prepare this contract ready for our prospect's signature this noon, and I can show it to those three who promised to come in at 11." He turned to leave the office. "And O'Connor, I'll pay you your commission when I see that thousand fifty—cold cash—and his name on the dotted line."

Ruth inserted a contract form in her typewriter and looked down at the paper on her desk. A name jumped out of the scroll—"Donald Mullen." Don—One thousand and fifty dollars! Their "nest egg." At 12 o'clock that precious savings account would be in the hands of the "Happy Hooligan Lunch company," lost. She saw O'Connor leave the office at 11:45. She could not leave until on the hour. The bank was four blocks away and the usual noonday crowds thronged the streets. It was 12:10 when she sped through the portals of the National bank. At the further end before the teller's window she saw Don—dear Don—counting a sheaf of bills in his hand. O'Connor stood expectantly near, hand outstretched.

She was just half-way down that long stretch of floor when Don started to hand the money to the salesman.

"Don," she cried, "Don! Oh, don't." Donald looked up quickly and there was a move to take the money. Ruth darted between them, breathless. "Don," she whispered. "Don—don't—don't—lose our—nest-egg. Let me explain."

He took her arm gently. "Why, Ruthie, what is it?" O'Connor broke in gruffly: "Well, let's settle this business first, Mullen. So I can be on my way. Ten fifty—and here is the contract."

"The business is settled, Mr. O'Connor. Mr. Mullen is—going to—buy one of those machines," Ruth spoke clearly, slowly.

"This is infamous, Miss Harrison. I shall report you to Mr. Ellington at once."

"Please do. Also tell him that he can have my half-week's salary. He will need it to get back East on. You can tell him I have resigned to get married—and that that money is going to buy furniture—not sandwiches, pickles and cake machines—and he will understand."

Clay-Marshall Duel
Before the famous Humphrey Marshall became a United States senator, he was a member of the Kentucky legislature. At the time Henry Clay was speaker of the same body, Clay's initial act in the interest of protective tariff was to introduce a resolution that the legislature should wear only clothes of domestic manufacture.

Marshall and Clay crossed in debate on the subject, had an altercation and a duel with pistols was the result. Both were slightly wounded in the encounter on the "field of honor," but nothing more serious was the result.—Detroit News.

Largest Locomotive
The Railroad Trainman says that the largest steel locomotive in the world has been constructed for the Northern Pacific railroad. It is 125 feet long and was built by the American Locomotive company, Schenectady, N. Y. In working order with coal and water, it weighs 1,116,000 pounds. It has a mechanical stoker which is capable of closing, delivering and distributing to the firebox hoefully a maximum of 45,000 pounds, or 22½ tons of coal. Its tender has a capacity of 22 gallons of water and 27 tons of coal.

Face Bound to Tell
Not long ago a Times Squarefare was housed in the Tombs for titrating at the Volstead law, reports Willard Keefe, our Tombs representative. Unable to get bail, he did six weeks there, when a pal called. The chum marveled at the fellow's decided change in appearance, the night-life pallor having yielded to the healthy glow provided by regular hours, sleep and wholesome food.

"Yeah," sighed the jailbird, "I guess the pace in here is beginning to tell."—New York Evening Graphic.

It Pays
Senator Borah was talking about the hero of a financial scandal.

"The man is honest," Senator Borah said. "Isn't it a matter of record that he once said to his pastor:

"Reverend, I'm one of those old-fashioned fellows who believe that honesty pays."

"Then he nudged his pastor in the ribs and added with a chuckle:

"And I believe just as firmly, reverend, that dishonesty gets paid."

Ancient Indian Blow Gun Has Modern Uses

It's a far cry from stealthy savages armed with the little-known, swift, quiet, blow gun to a white man adopting the primitive weapon to scare stray cats from his birds. But Bob Becker claims that is just what he is using a blow gun for. Writing in Field and Stream he tells of the champion "two lung gun" hunter in America now on the Cherokee Indian reservation in North Carolina and how he learned from him the trick of the blow gun.

The American blow gun, he says, is a long hollow tube of bamboo through which is blown short arrows feathered with thistle down. At 40 feet enough accuracy and speed can be attained by blowing these small missiles to kill a squirrel or other animal of similar size. After learning how to blow the gun this Field and Stream writer took it home to find uses for it. Having a number of birds on his place he had to protect them from cats. By throwing open a window and aiming his blow gun he could practice hitting these stray felines

with a blunted thistle down arrow. He discovered that it gave him quite a kick, annoyed the cats without hurting them and protected his birds to the bargain.

Red-Haired Celebrities
We find no reference in biographies to Caesar having red hair, though he was of fair complexion. Among others listed by various authorities as having had red hair are the following: Cato, Clovis, Frederick, Barbossa, William Rufus, Demetrius, Aferi, Tasso, Queen Elizabeth, Red Douglas, Red Comyn, Otto H. Camons, William H. Seward, Van Buren. A little biographical research would probably disclose numerous others.

Gold Mines Going Dry.
The 43 largest gold mines on the Rand crunched nearly 30,000,000 tons of ore yearly, but the supply is steadily diminishing and in 15 years' time the output may be only one-fifth of the present.

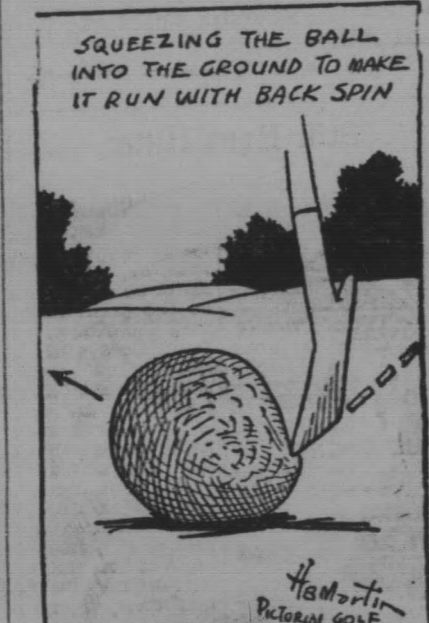

PICTORIAL GOLF INSTRUCTION

By H. B. MARTIN

Imperative to Keep the Head Down

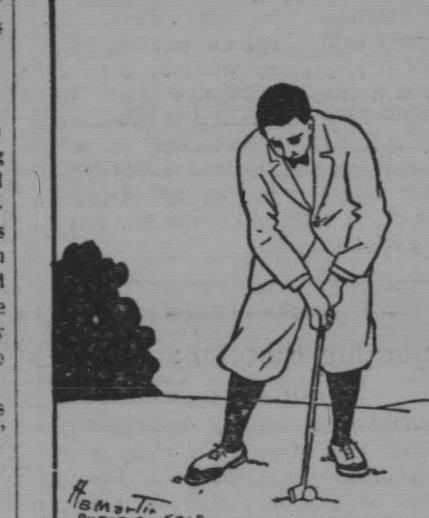

IT IS a cardinal rule in golf to keep the head down in all shots. It is almost absolutely imperative that one do this in playing a mashie shot. The main part of an approach shot if it is over a trap or water is that it goes high enough to clear everything. If the head is not kept down, there will be a tendency to bring the club up also. This must not be done, as the club in order to make sure of picking up the ball must go forward. This permits the left on the club to take care of the height of the flight. One may take the eye off the ball so long as the head is held in position, but it is not wise to attempt this.

Pinch Shot a Valuable Asset

A VERY valuable shot to know is the squeeze or pinch shot where the ball runs quickly along the ground with back spin. This shot is made by hitting the ball towards the top and squeezing it into the ground. It will jump slightly with a lot of back spin and run straight to the pin.

Those who play this shot find it useful on some courses. Those that are hard baked are preferred but soft greens are more for pitching directly to the hole. The shot must be played a lot to understand it and gauge the distance. Once the distance is properly gauged it is easy to make and a very useful shot. However, it may be said that the best golfers do not use this shot except on rare occasions.

In Putting, Keep Weight on Left Foot

WHEN Walter Hagen sets himself for a long putt, one watching from the edge of the green has the feeling that he is going to sink it. Walter certainly looks businesslike; he is at least prepared to give the ball a chance. He may have faults through the green, but making a chronic habit of stopping short of the cup is not one of them.

Notice any photograph of Walter in a putting stance and you will see that he is poised with the weight on the left leg as it should be. This means that there will be no underspin on the ball. The ball will run without a drag, especially if it is played off the left heel.

High Bird Temperature
The normal temperature of a bird is higher than that of a human being. It averages from 104 to 108 degrees. The temperature of some birds averages as high as 112 degrees.

Do They Learn It?

After a thoughtful woman has been married a certain time, she has learned to hang a clothesline in the basement in winter in such a way that it will invariably catch an unsuspecting male across the Adam's apple.—Detroit News.

Mechanical Stuttering
The height of curiosity would seem to have been reached by the man who wants to hear what a slow-motion talking picture would be like.—Portland Oregonian.

ADOZEN different things can cause a headache, but just one thing you need ever get relief. Bayer Aspirin is an absolute antidote for such pain. Keep it at the office. Have it in the home. Those subject to frequent or sudden headaches carry Bayer Aspirin in the pocket. Until you have used it for headaches, colds, neuralgia, etc., you no idea how Bayer Aspirin can help. It means quick, complete relief for millions of men and women who use it every year. And it does depress the heart.

Blinks—Jackson is a good boy. Jinks—Say, when that planning a vacation trip he is up a time valley instead of a map.

Charity often begins with reform is usually practiced of reform.

It's a case of true love is a good job to wash dishes "Gimmie."

OLD FOLKS SAY DR. CALDWELL WAS

The basis of treating colds changed since Dr. Caldwell's College in 1875; nor since the market the laxative had used in his practice.

He treated constipation, headaches, mental depression, sour stomach and other ailments entirely by means of simple laxatives, herbs and roots. The simpler the remedy, the better. The safer for the child. And as you can get reliable and safe way by using Dr. Caldwell's Syrup Pepsin.

A bottle will last several all can use it. It is a true taste, gentle, in action, and safe. Elderly people, children, and all who have the habit of constipation, or write "Syrup Pepsin" Monticello, Illinois, for free strong drugs.

Kill All Flies! Placed anywhere, DAILY KILLER kills all flies. West, clean, and safe.

HAROLD SOMERS, BOSTON

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take.

Any drug store has the genuine, prescriptive product.

PHILLIPS Milk of Magnesia

Stout Folks! Don't Be Tortured by Raw, Rubbed Skin

All Burning and Itching End in Three Minutes

Don't suffer from raw, rubbed, inflamed skin caused by friction of collars, belts, garters, brassiere, hat sweat, tight shoes or rubber soles. Don't get burning and itching in crotch or elsewhere make you miserable. Kora-Kona will give you relief in three minutes.

This soft, velvety, medicated powder, as directed by Menner's skin specialists—producers of the finest shaving cream, talcum, baby powder and other aids for skin trouble—immediately soothes, heals, and keeps the skin cool, moist, and free from irritation. Kora-Kona keeps garments dry. Prevents odor.

Get Kora-Kona from drugist today. Get skin torture, burning and itching forever.

Lines Busy

Canadians use the telephone more than any other people in the world, according to the press department of the Canadian National railways, which points out that in 1927 the average Canadian had 221 telephone conversations. In 1928 the average American spoke over the wire 205 times.

WILL DO ALL IT CLAIMS TO DO

Steele Says of Lydia E. Pinkham's Vegetable Compound

Pratt, W. Va.—"I was so weak and nervous that I was in bed most all the time and couldn't sit up and I am now 30 years old. I began doing my own housework and after I had taken three doses of Lydia E. Pinkham's Vegetable Compound I could feel that I was better. After taking two bottles I began doing my own housework and after I had taken three doses of Lydia E. Pinkham's Vegetable Compound I could feel that I was better. After taking two bottles I began doing my own housework and after I had taken three doses of Lydia E. Pinkham's Vegetable Compound I could feel that I was better."

Constipated

Johnny Schulte, the veteran catcher, who has seen service with the St. Louis Browns, Cardinals and Phillies, was acquired by the Cubs when Joe McCarthy's receiving staff was shattered by injuries. Schulte was supposed to report to the Columbus club of the American association this season, but had remained at his home in St. Louis because of salary difficulties. He had been claimed by the Reds at the close of the season on waivers from the Phils.

Dazzy Vance Still Dazzles 'Em

Vance is the Most Effective Pitcher in the National League.

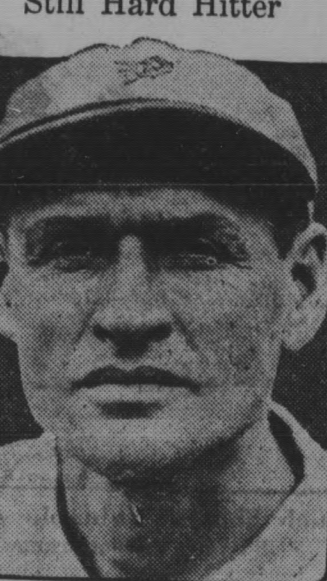

It was just sixteen summers ago when a red faced, awkward young giant came out of the Nebraska corn fields to pitch for Red Cloud. He won 11 and lost 15 that summer—nothing to bring a high league scout that far west. Three years later he pitched such effective ball for Hastings in that same Nebraska league that he was signed by the New York Yankees. The first thing he developed in the big league was a sore arm. For the next four years he was knocked around the minors with a vim and regularity that would have discouraged anyone who did not have a lion's heart.

Then his arm got well and he pitched so effectively for New Orleans in 1921 that Brooklyn signed him the next year.

Thus it was that Dazzy Vance began a major career in a class with that of Matty, Johnson and Waddell. For seven consecutive years he has reigned without a rival as the strike-out king of the major leagues. His record for these seven years is 1,333 strikeouts.

During last season he fanned as many as 200 batters. After six seasons on the hill the big Nebraskan seemed to have as much speed as ever. In fact, he hung up his most impressive record in 1928 when he turned in an earned run record of 2.00, leading his league. He won 22 games and lost 10. This is a remarkable achievement when it is considered that Vance depends upon speed alone for his effectiveness. It has come to be a by-word among players and fans the big league circuit over that when Dazzy "bears down" he is unbeatable.

Still Hard Hitter

Cy Williams of the Phillies, at one time as fast as any player in the National league, is beginning to go back on account of his legs. He still hits the ball hard.

Tommy Loughran Ranked First by His Manager

Joe Smith, manager of Tommy Loughran, light-heavyweight champion, in a talk over the radio, listed the eight leading heavyweights and light-heavyweights as follows:

1, Tommy Loughran; 2, Jack Sharkey; 3, James J. Braddock; 4, Paulino Uzcudun; 5, Young Stribling; 6, Max Schmeling; 7, Johnny Risko; 8, Jim Maloney.

Smith said Loughran was the only boxer in the group who had not lost a bout during the last five years. He explained his high rating of Braddock, light-heavyweight contender, by saying that he believed the hard-hitting Jersey City boy had enough strength and skill to defeat all of the men rated below him.

Nothing Emotional About Bob Meusel

There is nothing emotional about Bob Meusel, the clouting outfielder of the Yankees, who won the second game with the Athletics in their recent memorable series with a home run in the eighth inning with the bases filled.

In the clubhouse after the game, Bob was asked what kind of a ball he hit that gave the Yankees their second victory of the day.

"It was a curve ball," he answered.

"Was it a nice curve?" was the next question put to the outfielder.

"As nice as Rommel can throw," replied the outfielder.

"Well, it was a pretty nice hit," spoke up another one of Meusel's questioners.

"Well, a fair one," slowly remarked the outfielder.

Clouting Bob didn't appear to be excited over the biggest blow struck during the afternoon before the biggest crowd in the history of baseball.

Cubs Get Schulte

Johnny Schulte, the veteran catcher, who has seen service with the St. Louis Browns, Cardinals and Phillies, was acquired by the Cubs when Joe McCarthy's receiving staff was shattered by injuries. Schulte was supposed to report to the Columbus club of the American association this season, but had remained at his home in St. Louis because of salary difficulties. He had been claimed by the Reds at the close of the season on waivers from the Phils.

THIRTEEN IS NOT UNLUCKY NUMBER

Pitcher J. Miljus Has Seen Much Service in Box.

They call Roger Hornsby a baseball nomad because he never settles in one place for very long. But Hornsby is as stable as a rock compared to one member of the Indians.

The great National league slugger has seen service with seven clubs since he broke into professional baseball. John Miljus has worked for thirteen, writes Gordon Cobbledick in the Cleveland Plain Dealer.

John's baseball career started at the University of Pittsburgh in 1912. For three years he twirled for the Pitt nine and at the end of the 1914 season was signed by the New York Giants. The following season he jumped McGraw's outfit and signed with the Pittsburgh Federal league club.

That short-lived threat against the supremacy of the two major leagues went to smash and Miljus got a job with St. Mary's in the Interstate league, and the next year, 1917, found him with Brooklyn. The Robins farmed him out to Binghamton in the New York State league, and he promptly jumped again—this time into Uncle Sam's army.

The war over, he joined the Toledo Mudhens in 1919, and was back at Brooklyn in '20 and '21. The season of '22 he divided between New Orleans and Nashville in the Southern association. In '23 he was with the Rochester International leaguers and in '24 with Bridgeport in the Eastern league.

From Bridgeport he went all the way to Seattle and there, in the salubrious atmosphere of the Pacific Coast circuit, Big John seemed to find himself. He won 20 games in 1925 and in 1927 he crashed through with 12 straight victories and the Pittsburgh Pirates bought him in mid-season.

In the middle of last summer the Pirates asked waivers on him and, in the absence of General Manager Billy Evans and Secretary Walter McNichols, a clerk in the Cleveland ball club office put in a claim for his services.

It developed, however, that a quirk of baseball law fixed his price at \$10,500 instead of the established waiver price of \$7,500. Cleveland tried to withdraw from the transaction, but the Pirates appealed to Commissioner Kenesaw Mountain Landis and that high dignity ruled that the Indians must go through with the purchase.

There were chuckles all over the league and Miljus was called the \$10,500 white elephant and similar complimentary names. Then John began to pitch for the Indians and it became apparent that worse hurriers have been bought for more money. He took part in 11 games for Cleveland in the fall end of the 1928 season and, though his won and lost record wasn't impressive, the official average showed that he had allowed only 2.65 earned runs per nine-inning game.

Right now it looks as if Miljus will be one of the mainstays of the Indian pitching staff. He has a world of stuff, a good head and a great heart.

BASEBALL NOTES

High latitude in Canada makes twilight baseball after dinner possible.

Albie Booth, freshman at Yale, has captained football, basketball and baseball, a record.

Ray Lingre, out of the game last year with a sore arm, has been sold by the Cards to Rochester.

The Giants will try out a college southpaw when Johnny Hensel reports from the Villanova graduating class.

Fordham university will have a new baseball park for next season, Jack Coffey, graduate manager, announces.

In the spring a young man's fancy turns to thoughts of love. A minor league battery reads—Love and Spring.

Babe Ruth has been a big league player for 15 seasons and has an average batting mark of .347 for this period.

Harold Catcott, a catcher from Keosauqua, Iowa, has signed with the Dubuque team of the Mississippi Valley league.

Waite Hoyt, Yankee pitcher, first was signed by the Dodgers when they was the pitching sensation of Erasmus high school.

Johnny Bassler, formerly of Detroit, is the only catcher in American league history to finish a season with a perfect fielding average.

Walter Johnson made 21 wild pitches during the 1910 campaign, while Leon K. Ames, former Giant, bettered this by nine five years previously.

Billy Southworth, Card manager, is one of the few team pilots to come from the ranks of the outfielders. Most of them are catchers and infielders.

Harold (Ben) Turpin, right-hand pitcher, has been turned over to the Little Rock Travelers by the San Francisco team of the Pacific Coast league.

Jim Scott, former major league pitcher and now an umpire in the Southern league, spends his winter months working in a Hollywood studio as a carpenter.

We often think if there had been any baseball in the day of Janus, the two-faced chap in mythology, he'd have been a hard one to run down between the bases.

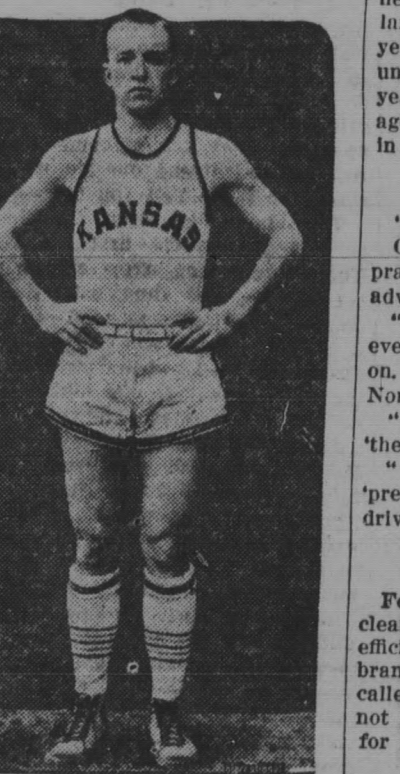

Pat Moran, former major league manager, has a nephew named Walter Sacen, who, while with a prep school in Massachusetts last year, won 22 out of 23 games. Two were no-hit affairs.

In the 11-inning game between Phillies and Giants April 23 there were 20 of McGraw's runners left on bases. Willoughby, of the Phils, was wild, passing nine batters and hitting one, but he was tight in the pinches and the Giants scored but one run off him.

The failure of Irvin Wimer, recruit shortstop, to get his arm in shape caused the Denver Bears to send out an SOS for a shortstop, and they succeeded in landing Marvin Smith, who performed for Wichita last year. He reported at once.

April 14 will be marked down with red ink in the book of infielder Gus Suhr of the San Francisco Seals. In the morning game against Sacramento, Suhr found Senator pitchers for two home runs, and in the afternoon he came back with one.

Wins Highest Award

Balfour Jeffrey of Topeka, Kan., sterling basketball player, who is the recipient of the highest academic honor that the University of Kansas can bestow upon any student within its halls, the honor award. But one award is made.

Sport Notes

The size and weight of golf balls will remain unchanged, it was decided at a meeting of the Royal and Ancient club, governing body of British golf.

A noted columnist opines that prize fighting has something to do with the crime wave. We admit that the Heeney-Tunney event was a crime.

Purdue university offers 24 sports in its intramural program. Its popularity is shown by 2,632 students out of 3,000 taking part in the sports, covering the "athletics for all" program.

Al Mello, the first man to whip Joe Dundee twice, is a Portuguese youth and fights southpaw style.

New York university lost a good football prospect when Heinie Dotterer, freshman star, quit school and signed to play baseball with the Rochester Internationals.

Lieut. Sir David Campbell, veteran sportsman who successfully rode the Sorcerer in the Grand National Steeplechase of England 30 years ago, is still active in the saddle.

Cigar Store Man Had Acquired Some Wisdom

A resident of a suburban town, returning from a business trip, was astonished to see painters at work on the front of a cigar store owned by a friend. He entered and sought out the owner.

"See here, Joe!" he exclaimed, "didn't you have your shop painted just a week ago?"

"Yes, I did."

"Then why in tarnation are you having it done over again?"

"It's just a case of human nature," responded the dealer. "When the job was done the painters put up the usual 'wet paint' signs. And as usual nobody believes in signs. The result was that the next day the whole front was covered with so many finger marks that it looked worse than before."

"But what if the same thing happens again?"

"It won't. There'll be no signs put up this time."—New York Sun.

Mysterious Jewelry

Little Betty was very fond of rings, and her fingers were always bedecked with all sorts of them. One day after she had visited her aunt she told her mother that she wanted a ring just like auntie's. When asked what kind of a ring auntie wore, she replied, "a musical ring."

"A musical ring," inquired the mother, "and what kind of a ring is that?"

After turning this over in her mind without a solution, mother got the aunt on the telephone, and much to her amusement learned that auntie was wearing a "band" ring.

Going Far Back

In the study of cosmography—in observing the nebulae of extra-galactic space—we are witnessing scenes and events which occurred in past ages. When we look out into the depths of space we are gazing back into history. The nearest star we see today as it was four and a half years ago; the nearest nebulae, the irregular Magellanic clouds, as they were 100,000 years ago; the frontiers of the known universe, as they were 200 million years ago back in the carboniferous age of the geologists.—Edwin Hubble, in Harper's Magazine.

The Forward March

"Even perfection can be perfected," Commander Richard E. Byrd was praising at a New York banquet, the advance made by aviation.

"There is room for improvement everywhere," Commander Byrd went on. "This was well understood by a Norfolk girl."

"Give me," said a Richmond girl, "the man who can drive with one hand."

"I, for my part," said a Norfolk girl, "prefer the man who asks me to drive."

A Matter of Safety

For softening water in laundry and cleaning work 20 Mule Team Borax is efficient and safe. This old reliable brand should not be confused with so-called "Borax compounds" which are not pure Borax. For safety's sake ask for 20 Mule Team.—Adv.

Too Much Advice

"It is not wise to give too much advice to the young," was the advice given to English adults by Lady Asquith. "I have learned from my own children that it is not wise to give them too much advice, but instead, if you put before them the wiser point of view, they will be wise enough to follow," she said.

"Women," she added, "are in the happy position of being on an equality with husbands, brothers, and other menfolk, except in the house of commons, where menfolk have not yet learned anything."

Peace Officers' Report

"Who were those two fellows you brought in, sergeant?" asked the police official.

"A couple peace officers, Loot, dis-turbin' each other."—American Legion Monthly.

Zero in Popularity

Blinks—He's not so very well liked, is he?

Jinks—Say, that pest is as popular as the bill for something you got stung on when you bought it.

But They Ate

She—Isn't the moon lovely tonight? Do you know it always fills me with hunger for something.

He (hastily)—Let's dance.—Tit-Bits.

Does death end all? Well, apparently, a great deal, anyway.

Wealth adds to a fool's folly.

Always Worn Out, Too

Teacher—Now give me the names of some pieces of clothing.

Children—Coat, hat, shoes, blouse.

Teacher—Now a piece of clothing for the hands.

Fritz—Trouser pockets.—Faun, Vienna.

Don't hold your head so high that you can't see where your feet are going.

The more bridges some folks go to the crosser they get.

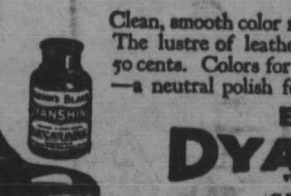

Was His First?

At the University of Maryland is housed an awkward steam-propelled automobile. It is the work of Dr. W. E. Aiken, a former professor at the university, who is said by many to have been the pioneer in such vehicles in America.

Prosperity affects a man's walk, his speech, his waistline and his opinion of himself.

There is no place like the home of a young man's best girl.

New life for old leather

Clean, smooth color restored. Stuffs concealed instantly. The lustre of leather revived. 50 wonderful shoes—50 cents. Colors for black, brown, tan and white shoes—a neutral polish for others.

BARTON'S DYANSHINE SHOE POLISH

Shocked Husband

Senator Moses said in Washington during an argument about a new bill: "We must look at these appropriation bills unselfishly. Selfishness in this matter would shock the country like—well, like the story."

"A loving husband sat at his wife's side while a palmist read her palm."

"This line here," the palmist said to her, "tells me that you are doomed, alas, to wear widow's weeds."

"Oh, my gracious!" she moaned, "for how long?"

Traffic Rules

"Miss, may I have your name and address?"

"Isn't it enough to bump into me on a ballroom floor?"

"It's the custom to exchange names in case of a collision."

Doubtful Praise

Singer—Did you note how well my voice filled the great hall?

Friend—Yes, people were kind enough to leave, so as to make room for it.

Mostly

"What do they mean by human interest?"

"Giria."

What About That Other \$100?

"I'm a \$10,000-a-year man."

"Then that makes your wife a \$9,900-a-year woman, doesn't it?"

A man doesn't enjoy getting laughed at by a crowd unless he is getting paid for it.

Russ Ball Blue delights the housewife. Makes clothes whiter than snow. At your Grocer's.—Adv.

MENLO PARK

Why Not Extend Oak Grove Avenue?
While the city council is engaged in opening blind streets they should take into consideration the continuation of Oak Grove avenue to the proposed Bayshore boulevard that is to be completed some time next year. There is only one mile distance between the end of Oak Grove and the proposed highway. A big travel would be diverted to Menlo Park by this means and the proposition is worth considering.

Memorial for Native Sons

The members of Menlo Park N. S. G. W. did not forget the duty they owed to the departed members of the order on Decoration Day. About twenty-five members formed a parade at the entrance of Holy Cross cemetery and headed by Marshal George Murray marched to the graves of the ten deceased brothers, where a beautiful and touching ceremony was performed. An American and Bear flag was left on each mound. Every year this ceremony takes place. The beautiful service displayed in remembering the departed is to be commended and the Native Sons should receive all praise.

Vested With Holy Habit

After a year novitiate at Corpus Christi Monastery, Sister Margaret with appropriate ceremony was on Thursday afternoon vested with the Holy Habit. The impressive ceremony taking place in the public chapel was witnessed by a large number of friends and relatives. The young lady appeared in bridal robes at the altar where she renounced the world and put on the habiliments of her order, a flowing white veil. The ceremony at this point was extremely touching for the young lady renounces the world to take up a life of sacrifice and prayer.

and will never again be seen in public. Her life is to be spent behind the gray walls of the monastery and when the final summons comes she will be placed away in a crypt in the basement of the building. In the basement of the building, in the world she was known as Miss Margaret Olsen, formerly a San Francisco school teacher. Miss Olsen is the fourth member of her family to enter religious life. One brother is a priest, formerly of San Francisco, and two sisters are nuns of the Third Order of St. Dominic of San Rafael. The ceremony on Thursday began with a high mass in the morning. In the afternoon the solemn vespers service and bestowal of the habit was conducted by three Dominican priests. Father Acock of St. Patrick's Seminary delivered the sermon for the occasion.

Jean Quayle Cowley Wins Honors

Jean Quayle Cowley won a first prize in one of London's leading newspapers, The Daily Sketch, in an open competition to the children of England, for writing on the subject, "What is your favorite subject at school, and why?" Jean chose history and was the delighted recipient of a handsome prize. There were thousands competing.

At the recent May Day Festival in Peel, Isle of Man, Jean secured first and special prize for the prettiest costume, "Bo-Peep," which was complete in every detail, even to the shepherds crook and a little lamb, which Bo-Peep led in blue ribbon harness. Her sister, Betty, filled the important role of May Queen and looked charming in her royal robes. They are nieces of Mrs. E. E. Quayle of University Drive, Menlo Park.

On July 1st the supervisors will open bids for the construction of a

joint bridge over the San Francisco creek close to where the old one went down a few months ago, near the Meyer place on the Santa Cruz road. It will cost about \$30,000. Bids are to be opened simultaneously by both boards. An aged controversy centered about the bridge. The late supervisor, John MacBain, would not agree to erect a new span for the reason that he held the proceeding in choosing the site was illegal. The old site of the bridge was a half a mile down the stream at the Lathrop estate, the road crossing it went through the Stanford campus and in order to avoid this annoyance to the university, Leland Stanford stipulated to change the road to the back of the campus. He gave a right-of-way for the new road and the span was erected. This was thirty years ago. The bridge, in time, became dangerous for the traveling public, but MacBain was obstinate. It took an act of Divine Providence to settle the dispute. MacBain passed away and the bridge went down. John Poole came upon the scene and soon the much needed span will be greeted by the motorists. Thus the curtain falls upon the aged long dispute.

County Clerk Elizabeth M. Kneese on Wednesday issued a marriage license to William Lawrence of San Francisco and Miss Rosalie May of Menlo Park. The pretty bride-to-be is one of Menlo Park's belles with a host of friends on the peninsula. The wedding will take place shortly.

Grammar School Closes

The grammar school closed yesterday with appropriate exercises in the evening in Masonic hall. The youngsters did well, showing the result of their training. Twenty-three were given diplomas. The school graduated 21st January. This is certainly a good showing for the institution.

Woodside

Mrs. J. A. Folger has closed her home at Carmel for the summer and will be established in her home here at the Folger ranch. Her daughter, Mrs. J. A. Donahoe and her family are with Mrs. Folger at the ranch. J. A. Folger, Jr., is in Honolulu for six weeks. Peter Folger graduates from Yale this year and will follow his graduation with a trip around the world.

Mr. and Mrs. Franklin Zane, their daughters, Miss Mary and Miss Margaret Zane, and Miss Frances Baldwin arrived in Paris from Italy. The Misses Zane have been abroad since last fall and were recently joined by Mr. and Mrs. Zane.

Robert Schurman came up from Los Angeles on Tuesday for a short visit at his home here.

Mr. and Mrs. Athol McBean arrived on Monday at the Josselyn place, where they will spend the summer. They were here last summer and have the Josselyn place under lease.

Miss Margaret Stewart gave a bridge luncheon on Saturday in honor of Miss Annie Templeton. The luncheon was given at the Oak Tree Inn at San Mateo.

The graduation exercises of the local school will take place today at 10:30. Those to be graduated from the eighth grade are Helen Hallett, Jennie Rae Christensen, Annie Bobick, Gladys Kelley, Minnie Helser and Walter Kelley. All of these will attend the Sequoia High School next year.

The Woodside Fire Department had a busy day on Sunday last. Four times during the day the department was called out. The fires were all brush fires and being caught early they were easily extinguished but they served to emphasize the danger brought to us by the many visitors on holidays. The department has prepared signs warning against the building of fires and the depositing of rubbish and papers. These signs may be procured by property owners from the Fire Department at cost.

The Installation Luncheon of the Parent-Teacher Association was held on Thursday at Jacksons. Mrs. Owens of San Mateo was the installing officer and the following officials were installed: Mrs. John D. Gish, president; Mrs. Leland John, vice-president; Mrs. J. V. Neuman, treasurer; Mrs. B. D. Ralston, recording secretary; Mrs. Albert Meyer, corresponding secretary, Mrs. George Shine, financial secretary.

Mrs. Otis Dudley, parliamentarian; Mrs. P. D. Jarvis, historian.

The Woodside Trail Club has opened its headquarters for the season at the Bernasque place.

The six new pupils for the high school bus next year will about make up for those from Woodside who will leave the high school by graduation. These are Mildred Langley, Kathleen Gish, Valerie Barrett, Jack Hosford, Carl Silva, Frederick Blackton and Tom Shine.

Off for the High Sierras

Joseph Cull and W. T. Casey, ex-eras last week to catch trout. When pert fishermen, sought the high Sierras they left Sonoma for the mountains ran into six feet of snow and had to return to Menlo Park troutless.
